ELEMENTI MODULARI

MODULAR ELEMENTS

Sono la parte mobile e la parte fissa della morsa Standard sezionate e rese completamente indipendenti per ottenere una versatilità estrema.

Are simply standard vises sections, the movable section and the fixed one, which in this way result completely independent for an extreme versatility.

Gli elementi modulari **GERARDI** Vi permettono di ottimizzare i blocaggi di pezzi particolarmente grandi, che richiedano le lavorazioni più gravose, sfruttando anche il piano della tavola della macchina come punto di appoggio. Gli elementi modulari sono sicuramente l'esempio (vedere applicazioni alle pagine seguenti) più lampante dell'estrema versatilità del sistema modulare Gerardi. La disponibilità di una vastissima gamma di composizioni (modulari) permette di realizzare con soluzioni standard anche gli allestimenti che credevate speciali

La morsa **GERARDI** sono ormai considerate sinonimo di produzione ad alto livello tecnologico per l'accurata scelta dei materiali impiegati e per la precisione raggiunta anche nei minimi particolari. Accuratamente rettificate in ogni loro particolare ed ampiamente collaudate, consentono:

✓ una capacità di massimo rendimento della macchina / ✓ un forte carico di pressione / ✓ una maggiore potenza di taglio / ✓ esclusione totale di vibrazioni / ✓ minor usura dell'utensile / ✓ una più precisa lavorazione

La costruzione con un sistema di elementi componibili consente le più svariate possibilità di impiego e combinazioni in caso di necessità.

GERARDI modular elements allow you perfect clamping even of big workpieces which need the heaviest machining using the machine table as surface. Modular elements are the best example of the extreme versatility of the Gerardi modular system. The availability of the broadest assortment program allows to build with standard solutions even the fixtures you thought special. They are a solution for a lot of applications and, with the many reference points available, a perfect complement or alternative to single or double vises.

GERARDI vises are manufactured under rigid quality control. Only the most suitable materials are used, and the accuracy of the even the smallest components is assured. As a result of the high standard construction Gerardi vises can maintain their accuracy under the most severe operating conditions. **Hardened and ground steel construction throughout allowing you maximum machine performance with:**

**✓ bigger clamping power / ✓ bigger cutting performances / ✓ total exclusion of vibrations / ✓ lower tool wear
✓ higher precision during machinework**

The modular design and the concept of interchangeability makes possible a wide variety of set up combination and solutions.

CARATTERISTICHE E VANTAGGI

- USURA INESISTENTE
- RAPIDITÀ DEI SERRAGGI
- MODULARITÀ & VERSATILITÀ
- PRECISIONI $\pm 0,02$ mm
- RIGIDITÀ & SICUREZZA
- DESIGN COMPATTO E MANEGGEVOLEZZA

Si rimanda a quanto esposto a pag. 1.4 e 1.5

(morse serie STANDARD)

TECHNICAL FEATURES and ADVANTAGES

- NO WEAR
- QUICK CLAMPING
- MODULARITY & VERSATILITY
- HIGHEST ACCURACIES $\pm 0,02$ mm
- RIGIDITY & SAFETY
- SPACE SAVING DESIGN & HANDY

See pag. 1.4 and 1.5 (STANDARD series vises)

1 RAPIDITA' DEI SERRAGGI

Grazie allo **scorrimento del gruppo di serraggio** nella guida della base (a cremagliera) fino in prossimità del pezzo da lavorare dove si adatterà automaticamente alla nicchia più vicina. L'operazione di serraggio si conclude agendo sulla vite di bloccaggio. Oltre a quello manuale meccanico, sono disponibili **4 ulteriori sistemi di serraggio** intecambiabili e indipendenti:

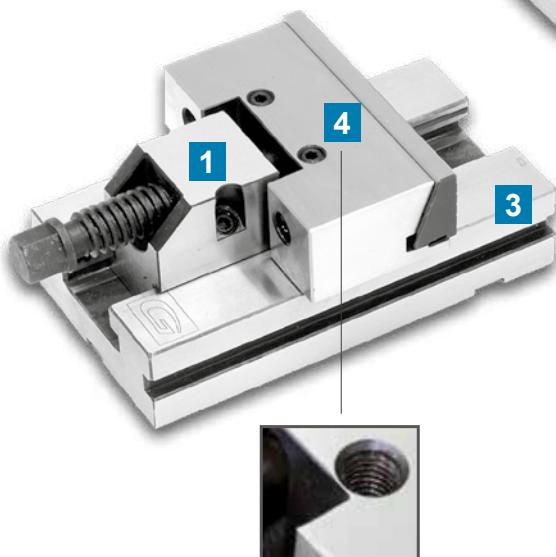

1 - Idraulici / 2 - Pneumatici / 3 - Idraulici manuali / 4 - Idraulici elettrici.
L'operazione è in termini di secondi.

1 QUICK CLAMPING

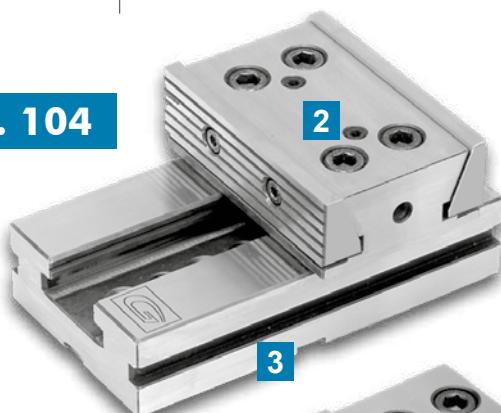

Thanks to the **clamping device sliding in the vise base slide** (compact rack type) till the proximity of the workpiece. The clamping is completed with the main screw. Besides the manual mechanic system, **4 further interchangeable and independent clamping systems** are available:

1- Hydraulic / 2- Pneumatic / 3- Manual hydraulic / 4- Electrical hydraulic.
The change needs only few seconds.

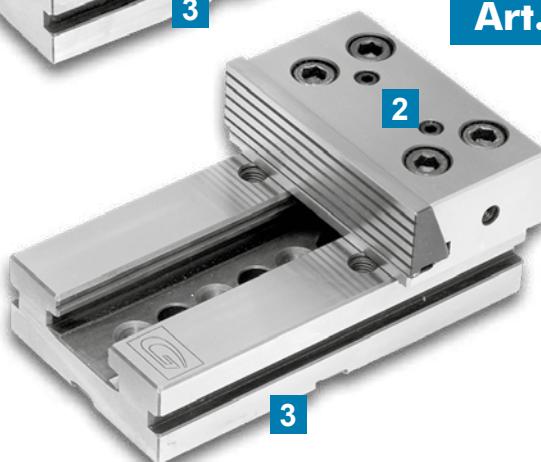

Art. 102

Art. 104

Art. 103

3 BASE VERSATILE

Slittone base (per Art.103 e 104) o elemento di prolunga (per Art.102) sempre previsti con chiavette di posizionamento longitudinali e trasversali per allineamento agli assi della macchina. Inoltre per le ganasce fisse sono sempre previsti 2 differenti posizionamenti per permettere alle stesse anche la possibilità di serrare pezzi direttamente appoggiati sul piano / tavola della macchina (vedi immagini pag. 3.6, 3.7)

3 BASE VERSATILITY

Vise bases (for Art. 102 and 104) or base extensions (for Art. 102) are always built with longitudinal and cross keyways in order to be aligned with the machine axis. Furthermore fixed jaws have always 2 different positions in order to be able to clamp even workpieces positioned on the machine table directly (see images on pages 3.6, 3.7).

2 GANASCE FISSE RIPOSIZIONABILI

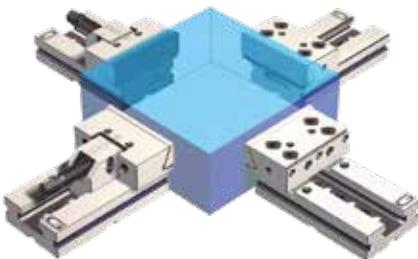

La ganascia fisso hanno la possibilità di essere posizionate sia con piastrine all'interno della base (come nelle foto), sia con piastrine che fuoriescono dalla base in modo da poter serrare anche particolari posizionati sul piano della tavola della macchina

2 FIXED JAWS with DOUBLE POSITIONS

Fixed jaw have the possibility to be positioned both with jaw plates inside the vise base (as shown in the picture) and with jaw plates externally from the vise base in order to be able to clamp even workpieces positioned on the machine table directly.

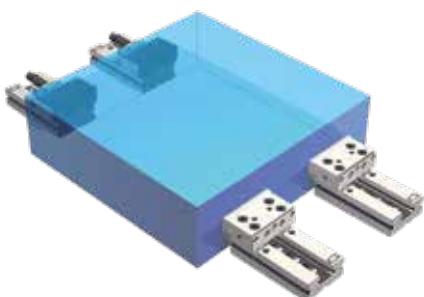

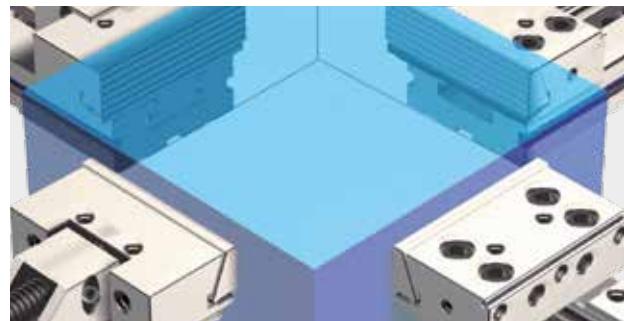

ESEMPI APPLICATIVI CON UTILIZZO ELEMENTI MODULARI

APPLICATION EXAMPLES USING MODULAR ELEMENTS

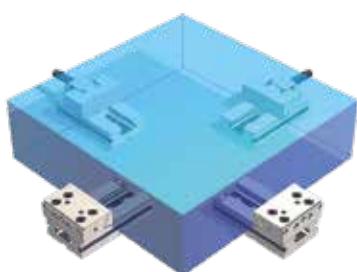

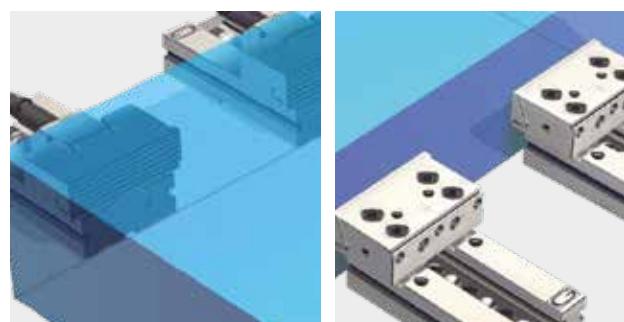

Esempio n°1 - Example #1

Particolari di grosse dimensioni posizionati su tavola macchina
Huge workpieces clamped directly on the machine table

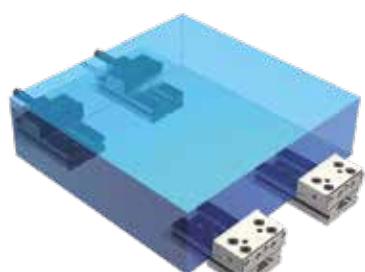

Esempio n°2 - Example #2

Esempio n°1 - Example #1

Particolari di medie dimensioni posizionati sugli elementi modulari.
Medium size workpieces clamped on the vise sections

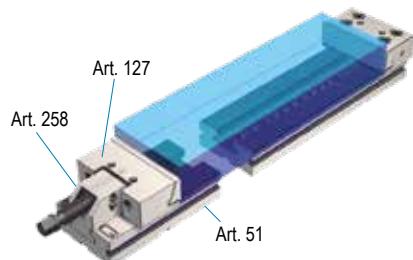

Esempio n°2 - Example #2

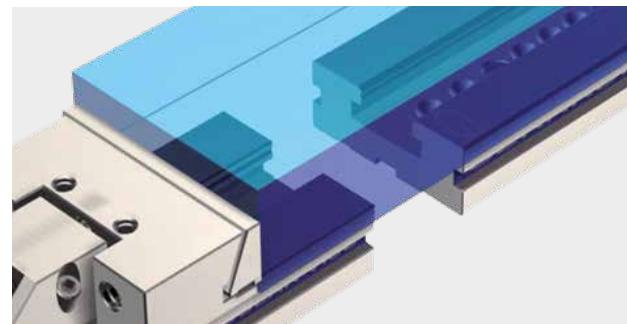

ESEMPI APPLICATIVI CON UTILIZZO ELEMENTI MODULARI

APPLICATION EXAMPLES USING MODULAR ELEMENTS

Art. 1 + Art. 51

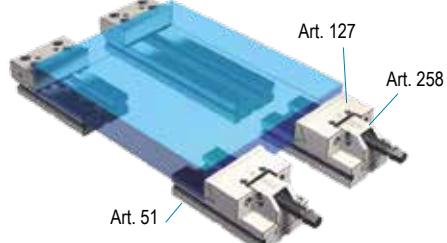

Esempio n°1 - Example #1

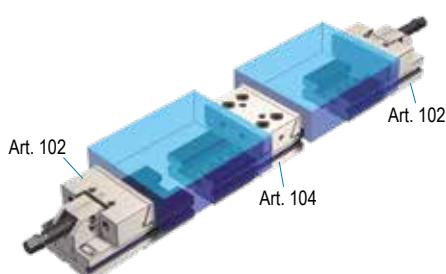

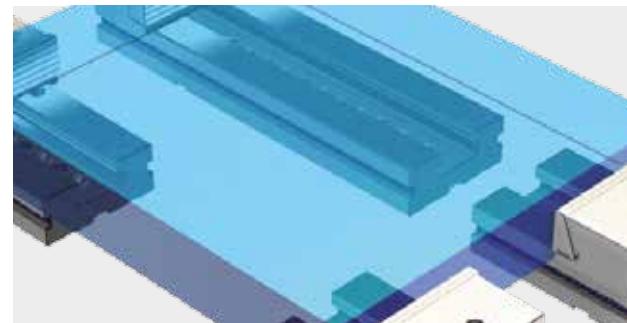

3

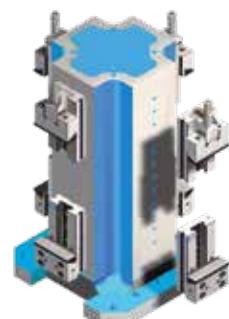

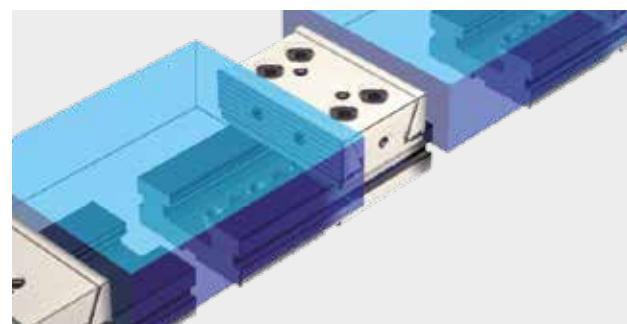

Per realizzare una stazione mobile è sufficiente sfilare dalla morsa Art.1 il gruppo di bloccaggio Art.258 + la ganascia mobile Art.127 ed inserirli in un elemento di prolunga Art.51.
 In order to get a movable vise section it is enough to remove from vise Art.1 the blocking device Art.258 + the movable jaw Art.127 and to assemble them on an extension base Art.51

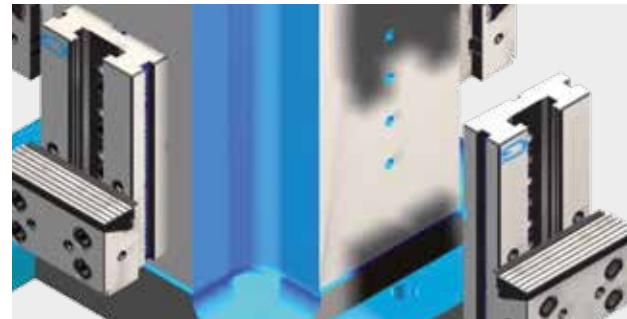

Esempio n°2 - Example #2

Elemento modulare fisso doppio (Art. 104) + 2 elementi modulari mobili (Art. 102)
 Double fixed vise section (Art. 104) + 2 movable vises sections (Art. 102)

Elementi modulari montati su cubo a croce Art. 5.57
 Modular elements assembled on cross cube type Art. 57

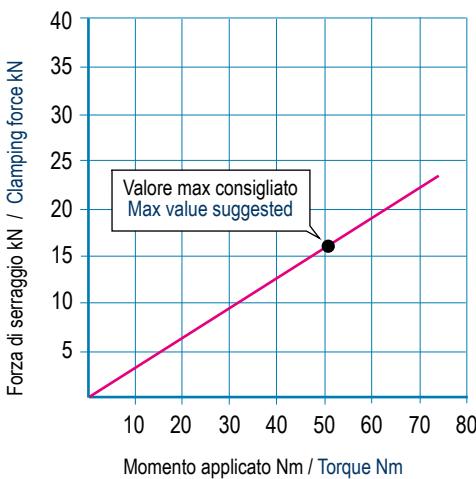

DIAGRAMMI SERRAGGIO MECCANICO CON CHIAVE DINAMOMETRICA

DIAGRAMS MECHANICAL CLAMPING WITH TORQUE WRENCH

ELEMENTI MODULARI TIPO MODULAR ELEMENTS TYPE 1

Vite M12 - Passo 1,75mm
Screw M12 - Pitch 1,75mm

GRUPPI DI SERRAGGIO MECCANICI

(**Art. 258 e similari**)

I diagrammi seguenti consentono di determinare le forze di serraggio ottenibili con le morse di varia grandezza (da 1 a 6), in funzione del momento applicato

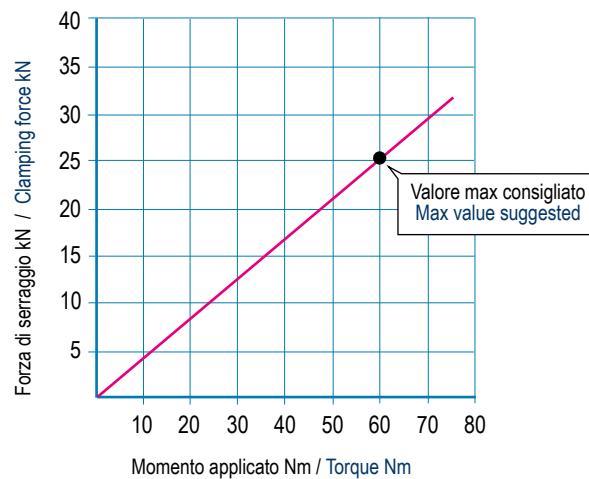

MECHANICAL CLAMPING DEVICES

(**Art. 258 and similar**)

The following diagrams give the clamping force that can be obtained with each vise type (size 1 to 6) depending on the torque

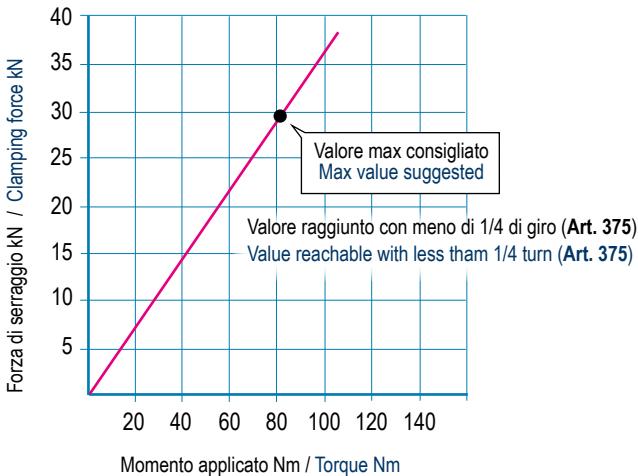

ELEMENTI MODULARI TIPO MODULAR ELEMENTS TYPE 2

Vite TPN18 - Passo 4mm
Screw TPN18 - Pitch 4mm

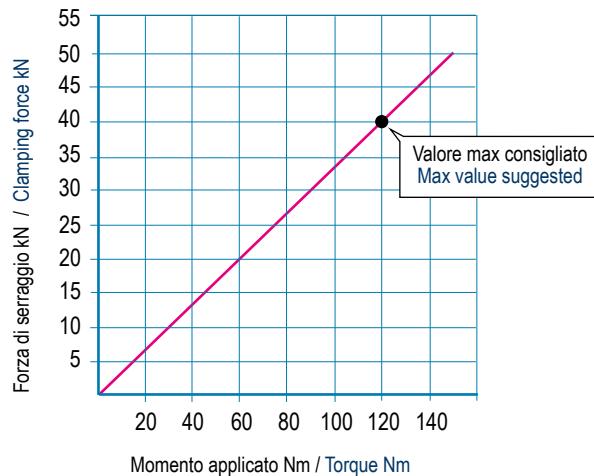

ELEMENTI MODULARI TIPO MODULAR ELEMENTS TYPE 3-4

Vite TPN24 - Passo 5mm
Screw TPN24 - Pitch 5mm

ELEMENTI MODULARI TIPO MODULAR ELEMENTS TYPE 5-6

Vite TPN30 - Passo 5mm
Screw TPN30 - Pitch 5mm

NB: Alcuni fattori, come la lubrificazione, lo staffaggio, gli attriti ed altro, possono modificare i valori indicati fino a $\pm 10\%$.

Per un corretto utilizzo non superare i valori indicati nel grafico

Some factor as lubrication, clamping on the machine table, frictions and more can modify above values within a $\pm 10\%$ range.

For optimum operation do not exceed chart values.
